9264412433 | github.com/rahulyadav7418 | linkedin.com/in/rahul-yadav-87b2933b3

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Bootstrap, Grid System, JavaScript, React.js

Other: MongoDB, Express.js, Node.js, REST APIs, Git & GitHub

EDUCATION

B.Tech, Computer Science & Engineering (Artificial Intelligence)

Dr. M.G.R. Educational and Research Institute, Chennai | Expected Graduation: 2028

CGPA: 7.78 / 10

PRACTICAL EXPERIENCE

Full-Stack Web Development — Personal & Academic Projects

- Built end-to-end MERN applications covering frontend UI, backend routing, REST API design, and database operations.
- Designed and implemented complete application workflows from data modeling through user-facing interfaces.

ACADEMIC PROJECT

AI-Powered Interview Platform

React.js · Node.js · Express.js · MongoDB · Mongoose · REST APIs

- Architected and built a full-stack interview-simulation platform end-to-end, covering UI, REST API layer, and database design.
- Designed a structured, multi-stage interview workflow with selection by interview type and technical category, plus difficulty-based practice modes for targeted skill-building.
- Built dynamic question delivery, answer submission, and real-time scoring logic in React.js, with clean state management across the interview flow.
- Modeled interview sessions, questions, and results in MongoDB using Mongoose schemas, and exposed them through RESTful Express.js APIs consumed by the frontend.
- Implemented a results dashboard summarizing performance by category and difficulty to help users track improvement over time.
- Independently handled the complete development lifecycle — planning, frontend, backend, database, and testing — as a solo project.
- GitHub: github.com/rahulyadav7418/AI-Interview-Simulator

POSITION OF RESPONSIBILITY

Software Development / Hackathon Participant

- Participated in software-development-focused hackathons, building practical web-development solutions under time constraints.

CERTIFICATIONS

- InternHill Code Sprint — Certificate of Participation, organized by InternHill Solutions (via Unstop)

ACHIEVEMENTS & INTERESTS

- Passionate about full-stack web development and building practical software projects.
- Continuously exploring modern web technologies and strengthening problem-solving skills.
